

CONTENTS

Selected physiochemical properties of dimetacrylate resin blend modified with liquid rubber M. Sowa, K. Pałka	165
Experimental characterization of hemp woven fabric reinforced epoxy resin composites produced without heat treatment G. Donini, L. Molari	171
The influence of plasma spraying parameters on structure and properties of Stellite 31-Cr₃C₂ composite coating T. Kubaszek, B. Kościelniak, M. Góral, K. Hładun, K. Świerk	181
Determination and verification of mechanical properties of GFRP filament wound pipes M. Krzysztoporski, K. Paczkowska, Z. Pacholec, W. Błażejowski	188
ATZ composites resistant to subcritical crack propagation A. Wojteczko, M. Grabowy, A. Wilmański, S. Komarek, D. Kozień, W. Pyda R.M. Peña Capote, Z. Pędzich	194
Inspections of aircraft composite components S. Zeltiņa, M. Kleinhofs, R. Chatys	200
New approach for an inspections program and use of C-factor model for stress analysis of composite component structure K. Nechval, R. Chatys, I. Petukhov, A. Bain	205
